- Tailwind
- Adaptive layout
- Webpack
- Docker
- Git
- REST API
- SQL
- Linux

SUMMARY

Hi! My name is Mike. I am 26 years old.
I am seeking to start a career as a full stack web developer. I've been doing that as a hobby since 2018 taking courses in my spare time.
Looking for a full time job or a project work, remote or office.

PROJECTS

WildChord mikekurkin/wildchord-js   jul '22 – present

Python, Django, TypeScript, Bootstrap
A notepad for songs with support for chord highlighting. It uses CodeMirror as a base for text editing. The backend and frontend are separated into two independent services, linked by a REST API. The app layout is designed adaptively. It behaves well on both mobile and desktop, and has dark theme support.

Commerce, Network mikekurkin/cs50w   jul '22

Python, Django, JavaScript, Bootstrap
A simple eBay-type auction site and a Twitter-type social network with basic functionality, both written as learning projects during the CS50w course. Both sites are designed adaptively and behave well on both mobile and desktop.

SongSpleet mikekurkin/songspleet-tg-bot   feb '21

Python
Telegram bot that uses Deezer's Spleeter library to separate songs into 2 "stems": vocals and accompaniment. It takes an audio file from the user, splits it on the server, and sends back the resulting files.

LANGUAGES

– Russian — native
– English — B2, Upper Intermediate
– German — A1, Basic

WORK EXPERIENCE

Hyundai WIA, Saint Petersburg   aug '21 – present

Automotive Business, Engine Manufacturing
Production and Shipments Planning Specialist

– Building short- and medium-term production plans based on customer needs.

Participated in plant start-up.
Automated planning process, reducing time spent daily from 3 hours to 15 minutes.
Overseen several small batch test production projects.
Actively participated in tweaking MES and ERP systems to correct operational issues and develop new features.

Continental Tires, Kaluga   jul '19 – aug '21

Automotive Business, Tire Manufacturing
Production Planning Operator

– Planning of small batch production: weekly production plan, load distribution according to available production capacity, creating the shift assignment.

Beeline, Kaluga   apr '14 – apr '15

Internet Service Provider, Fixed and Mobile Communications
Technical Support Engineer

– Technical support of the company's clients, registration of requests, monitoring and troubleshooting of ISP network equipment.
